DeFi Bank Tycoon Game Playing Rules

And How To Play

DeFi Bank Tycoon is a game of building a **DeFi Bank Empire** where you can potentially earn a percentage of all the money that comes into the game (**The DeFi Bank Tycoon Game Treasury Department** - “The Treasury” - “Treasury Rewards”).

The object of the game is to buy, sell, trade, finagle your way to becoming a DeFi Bank Tycoon owning as many **DeFi Banks and Land Parcels (NFTs)** as possible.

Bank:

Land Parcel

To qualify to earn Treasury Rewards **you need to hold three things** in your wallet:

Banks, Land Parcels and [DBTYCOON Tokens](#)

Each bank requires a land parcel to be in qualification. In other words you need **bank and land parcel matches**.

EXAMPLE: If you own 5 banks you need to also own 5 land parcels (to build the banks on). If you have 5 banks and only 4 parcels, only 4 banks/parcels qualify, etc.

Think of the game in terms of poker as far as qualifying for highest rewards.

EXAMPLES:

5 of the same bank on 5 of the same land parcels is more valuable than 5 different banks or 5 different land parcels.

5 of the *rarest* banks on 5 of the rarest parcels is more valuable than 5 less rare banks on less rare parcels.

Quantities also count, so, for example 6 of the same rare bank/rare parcel matches out-value 5 of the same rare bank/rare parcel matches.

TIES: In case of a tie where each player has the same hand the *winner is whoever also holds the most DBTYCOON tokens.*

As the game progresses holding as much DBTYCOON as possible will most likely be the edge you will need to cash in on the weekly payouts.

An updated bank/parcel value chart can be found at <https://defibanktycoon.com/values>

Every 7 days 80% of the Treasury's holdings are paid out to the top 77 players. So the goal is to be one of the 77 biggest DeFi Bank Tycoons to qualify for a share of the week's Treasury payout.

WEEKLY PAYOUTS:

5% of the Treasury Payout goes to the top 2 Tycoons. And 1% of the Treasury Payout goes to each of the rest of the qualifying Tycoons.

First Place (Biggest Tycoon) - 3%

2nd Place - 2%

The next 75 Players - 1% each

OTHER WAYS TO EARN:

Even if you aren't one of the top 77 players for the week (or even if you are) there are other ways also to make money in DeFi Bank Tycoon Game.

You can potentially earn money simply by **buying and selling DeFi Bank Tycoon NFT's.**

You can also potentially earn money by **buying and selling and holding DBTYCOON Tokens.** There is a maximum supply of only 311,622 DBTYCOON Tokens. So it's very likely as DeFi Bank Tycoon

becomes more and more popular the price of DBTYCOON may go higher.
